

Access to database of scripts

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 16.02
-

Description:

I understand that there is a database of SQL (and other) scripts created by other Aleph 500 customer sites.

We do not have a password to access that site. How do we go about getting one?

Resolution:

The website is: <http://tech-admin.exlibris-usa.com/customers/>

As described in the Help there, you need to email tech-admin@exlibris-usa.com to get an account.

Additional Information

scripts
