
p_print_03 and p_print_01 produce no output

- **Article Type:** General
- **Product:** Aleph
- **Product Version:** 18.01

Description:

When we run p_print_03 (and p_print_01), it runs to completion with no errors, but no output file is produced.

Resolution:

Looking at the log in \$alephe_scratch, I find that the name of the input file is specified as "jesuitana_duplicate_sysnos", whereas it is actually "jesuitana_duplicates_sysnos".

It's odd that the job log doesn't give any message for this error, but that *is* the cause of the problem.
