-

Description:

When we try to fix a records punctuation or save a record (which is supposed to automatically fix the punctuation), the punctuation isn't changing.

Resolution:

In order for the tab_subfield_punctuation to be used, the field must be linked to an authority record.

I find that, though the ABC01 Z01 ACC heading for

UTIL-F-4 z01

key 1

SUB LPORTER KATHERINE ANNE 1890 1980

is linked to an authority record (as seen in the z01_rec_key_4 Z01-AUT-LIBRARY and Z01-AUT-DOC-NUMBER), the Z01 SUB LPORTER KATHERINE ANNE 1890 1980 CRITICISM A...

is not.

This has to do with the SUB lines in tab20. I see that, though the

SUL SUB ...

lines are present, the

SUB SUB ...

lines are commented out.

Since, as determined by tab11_ACC, the index which is being used for these 600's is the SUB index, the SUB SUB lines need to be present in tab20.

You should correct these and then resend a few records to the server to verify (in UTIL-F-4, as shown above) that the z01_rec_key_4 Z01-AUT-LIBRARY and Z01-AUT-DOC-NUMBER are correctly populated. If so, you can do a "complete ue_08" (-- by specifying the "N" mode in starting it, rather than the usual "C"--).
