

## GDC and BulkImport simultaneously?

- **Article Type:** Q&A
  - **Product:** Voyager
  - **Product Version:** 8.1.1
- 

### Question

Can we run Global Data Change (GDC) jobs and BulkImport jobs simultaneously?

---

### Answer

You should avoid running GDC and BulkImport jobs simultaneously, as both processes can be resource-intensive, and issues may arise if both processes attempt to update/overlay the same record(s).

---

### Additional Information

See Global Data Change Document, "IMPORTANT - Before You Begin" section, which covers system prerequisites, best practices and other considerations for planning data changes.
