

OCLC Connexion Client Gateway - Adding Rules

Question

How to add Normalization, Validation or Merge rules to the OCLC Connexion integration profile?

Answer

To add Normalization, Validation or Merge rules:

1. Go to: General Configuration Menu
2. Click: Integration Profiles
3. Click the OCLC Connexion profile
4. Select the "Actions" tab
5. Inspect and refresh the rules from a selection of drop-down list for each field.
