
Bib info does not display on item screen's title bar

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
-

Description:

When displaying item screen, the BIB record number and ADM record number appear at top of screen, but author and title information does not.

Resolution:

The bib information is taken from the z13. Please make sure there are correct z13 records in BIB and ADM libraries. To check, update a record and see whether the information appears on the Title bar after updating.

The configuration for the information on the Title bar is defined in the \$aleph/error_eng:

For Cataloging:

pc_cat_c0203:

```
! $1=title, $2=author, $3=system number, $4=FMT.  
2001 0000 L $4 System No. $3 $1 ($2) Year: $5
```
