
clear_vir01: "no privileges on tablespace 'TSnx'"

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
-

Description:

Our clear_vir01 log has the following error messages multiple times:

ORA-01950: no privileges on tablespace 'TS1D'

ORA-01950: no privileges on tablespace 'TS2D'

and no vir01 tables are created.

Resolution:

We saw the following in this case:

```
aleph_admin@ALEPH20> select TABLESPACE_NAME, BYTES, BLOCKS from dba_ts_quotas where username='VIR01';
```

```
TABLESPACE_NAME BYTES BLOCKS
```

```
-----  
SYSAUX 0 0  
USERS 0 0  
TSLOB 0 0  
LOG 0 0  
TS0 0 0  
TS1 0 0
```

So we did this to correct it:

```
> sqlplus aleph_admin/aleph_admin
```

```
ALTER USER "VIR01" QUOTA unlimited on "TS1D";  
ALTER USER "VIR01" QUOTA unlimited on "TS1X";  
ALTER USER "VIR01" QUOTA unlimited on "TS2D";  
ALTER USER "VIR01" QUOTA unlimited on "TS2X";  
ALTER USER "VIR01" QUOTA unlimited on "TS3D";  
ALTER USER "VIR01" QUOTA unlimited on "TS3X";
```

```
ALTER USER "VIR01" QUOTA unlimited on "TS4D";  
ALTER USER "VIR01" QUOTA unlimited on "TS4X";
```

(Though the error is for TS1D and TS2D only, the privileges should be set for all tablespaces.)
