

Removal of folders left over from upgrade process.

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 17.01
-

Description:

We have a number of folders left over from the upgrade process that I'd like to remove both to free up disk space and to speed up the backup process. Since we are operational now on 17.01 and have been for some time. Can I remove the following folders and all of the files below them with no adverse problems?

```
/exlibris/aleph/a16_1  
/exlibris/aleph/u16_1  
/exlibris/aleph/u17.1.exlibris  
/exlibris/aleph/upgrade_express_1602_1701
```

Resolution:

Yes, once you are certain that the version 17 upgrade has been successful, you can delete these directories.
