
ADAM digital objects from PC and web

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

When I add digital objects, both pictures and textual articles, do they have to be on the PC network? I want to add them while they are on another server which I access via the internet, using a URL such as <http://www.something.com/picture.jpg> or <http://www.something.com/article.txt> . Can I use ADAM when the pictures and articles are on the internet?

Resolution:

See attachment
