

How to modify an URL in some records?

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Desired Outcome Goal:

How to modify an URL in the record to start with

"<http://libprox.gold.ac.uk:2048/login?url=>"

Procedure:

To change the value of field 856 use fix_doc_do_file_08 the following way:

1. Add a line to xxx01/tab/tab_expand

```
856 fix_doc_do_file_08 856_fix
```

2. Create a file xxx01/tab/import/856_fix with the following content:

```
1 856## REPLACE-STRING http,http://libprox.gold.ac.uk:2048/login?url=http
```

For changing the records the following tasks are required for the affected records:

1. Run "Download Machine-Readable Records (print-03)" and select only field 856##
2. For the output file of print-03 run "Load ALEPH Sequential MARC Records (manage-18)" with options
 - Update current records in the database
 - Replace fields within a record
 - Fix routine 856
