

How to increase the maximum sort?

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18 and up
-

Description

Currently there is a maximum sort of 1000 records for short display of bibliographic records:

```
Results for Words= ...  
Records 1 - 10 of nnnn (maximum sort is 1000 records)
```

How do we increase it to 5000 records?

Resolution

The "maximum sort is nnnn records" text is coming from this line in `./www_f_eng/short-include-2:`

```
Records $0100 -$0200 of $0300 (maximum sort is $4500 records)
```

The \$4500 variable is actually the displayed result set. Thus, this should be changed to:

```
Records $0100 -$0200 of $0300 (maximum of $4500 are displayed)
```
