
unable to use e-mail output option for object portfolios

- **Article Type:** General
 - **Product:** SFX
 - **Product Version:** 4
-

Description:

A problem has been found when trying to use the 'output to e-mail' option of the 'HTML Reports'.

This behavior occurs when the 'Filter to active/localized only?' is set to 'Yes', the 'Object Portfolios select target service' radio button is ticked and the 'Select output type' is 'Email'.

In this case, an e-mail is not sent as expected and instead, a 'Screen' output with 'Refine result set' options is displayed.

Please find a screenshot in the attachment.

Resolution:

Additional Information

e-mail output option HTML report
