

## Oracle table descriptions

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 16.02
- 

### Description:

I ran UTIL-H-1-4 (Library report on file\_list) and it reported that I don't have the following tables: z120, z127, z114.

The v16.02 documentation does not have any description of these.

What are they?

### Resolution:

The z120 is the union catalog / union view like-document table; the z127 is an abbreviated version of the z120, used to improve union catalog performance. If you don't have union catalog/union view, you don't need z120 or z127 tables.

The z114 table Z114 is used for CJK word building and CJK filing. If you want to index the 880 CJK fields in a bib library, you need to copy ./usm01/files/z114.seqaa to the library and run p\_file\_04 to load it. Otherwise, you do not need it.
