
Dates when making hold requests on Web OPAC

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 16.02
-

Description:

When a user makes a hold request he/she is asked to define the "period of interest". This is in the page item-hold-request-tail.

We do not want users to change the first date, but I do not know how to prevent this option from appearing.
How to define FROM DATE into a non-editable text-box populated with the current date for hold request ?

Resolution:

We suggest to use the following definition in the item-hold-request-tail page:

```
<td class="td2" nowrap>Period of interest from $3600</td>
```

```
<td class="td2" nowrap>
```

```
<input size=10
```

```
maxlength=8
```

```
input type="hidden"
```

```
name="from"
```

```
value="$3600">
```

This will display the "from" date as part of the textual caption on a screen:

"Period of interest from 20050615 to " leaving the "to" date editable.

Additional Information

hold request
