
Oracle down: ORA-00600: internal error code

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 16.02
-

Description:

Fifteen minutes after we restarted ALEPH/Oracle, Oracle has gone down. We see these messages in the Oracle alert log:

Errors in file /exlibris/app/oracle/admin/aleph00/bdump/aleph00_dbw0_14979.trc:

ORA-00600: internal error code, arguments: [kslawe:!pwq], ,

[], [], [], []

Thu Feb 15 18:09:22 2007

Errors in file /exlibris/app/oracle/admin/aleph00/bdump/aleph00_dbw0_14979.trc:

ORA-00600: internal error code, arguments: [kslawe:!pwq],

,

[], [], [], []

Thu Feb 15 18:09:22 2007

DBW0: terminating instance due to error 600

Thu Feb 15 18:09:22 2007

Errors in file /exlibris/app/oracle/admin/aleph00/bdump/aleph00_pmon_14977.trc:

ORA-00600: internal error code, arguments: [], [], [], [], [], [], [], []

Thu Feb 15 18:09:23 2007

Errors in file /exlibris/app/oracle/admin/aleph00/bdump/aleph00_lgwr_14982.trc:

ORA-00600: internal error code, arguments: [], [], [], [], [], [], [], []

Instance terminated by DBW0, pid = 14979

Resolution:

When we restarted Oracle again, we did not get these errors.
