

## Add date field to Course Reserve tab?

- **Product:** Voyager
  - **Product Version:** 8.0.0
- 

### Question

I can display the date from the 008 field when I do a Title search. Can this field be displayed in results for Course Reserve search too?

### Answer

Course Reserve search is configured differently than other search tabs. Basic, Advanced, Subject and Author search tabs use indexes defined in System Administration, where you can configure fields to display in search results. Course Reserve search does not use these indexes and the fields to display in search results are not configurable in this way.
