## How to prevent messages "Library code XXXNN not in file library.ini"?

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 20
- 

### Desired Outcome Goal:

When downloading records from z39.50 bases, or using Duplicate record (Ctrl + N) in GUI Catalog, several screens open indicating that the libraries named are not in the Library.ini file. How to prevent these messages?

### Procedure:

1. Remove the unwanted libraries from \Catalog\tab\per\_lib.ini.
2. Close and reopen GUI Catalog.

**Category:** Z39.50 (500)
