

Selecting print preview just closes the report window

- **Article Type:** General
 - **Product:** Voyager
 - **Product Version:** 5.2
-

Description:

In the ILL Reports module for 6.3, run a report and the report displays in a separate window. Select the File> Print Preview option to try to see how the report will print out. Instead of displaying the print preview screen, the report window is closed and the Main screen displays again.
