

## Changing fonts for field labels in Cataloging

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 16.02
- 

### Description:

In Cataloging, open a record or create a new one by template; note the field labels in the left-hand side, e.g. 'Main title'. These are in italics; we want to stop them being in italics. There does not seem to be any setting in catalog.ini controlling the 'italics' aspect.

### Resolution:

This is controlled in the client files.

In Alephcom\Tab there is a file called font.ini.

The EditorDescription section covers the display of the name tags in the Cataloging module.

You will see that column 6 is for italics and for this section is currently set to Y. If you change this to N, close and reopen Cataloging, you will see that these are no longer italic.

---

## Additional Information

italics, field label, font
