

## p\_cir\_60: z320: "cannot CREATE UNIQUE INDEX; duplicate keys found"

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 16.02
- 

### Description:

The advanced bookings schedules did not reflect the new changes made to tab43. In an attempt to correct this, z320 and z321 were dropped using util a /17/1.

All of our runs of p\_cir\_60 have the following error:

ORA-01452: cannot CREATE UNIQUE INDEX; duplicate keys found

### Resolution:

I have changed tab43 so that the "E" entries for 2006 are at the top of that list (above the 200# entries) and not at the bottom. I reran cir\_60 and there were no error messages nor duplicates.
