Description:

I want to get a list of system-numbers from library ABC50 by doing a retrieval on field 012 in ADM-record using p_ret_01. Unfortunately the output file is empty.

Resolution:

In logfile of p_ret_01 we see the following error messages:

Section 99 for 012 was not found in tab_filing

Section 99 for 012 was not found in tab_filing

Explanation:

By default service p_ret_01 uses section 99 from tab_filing to retrieve the contents of the specified field (You may define a different filing procedure in col 3. of tab01.eng).

In tab_filing of ABC50 only section 55 is defined.

Solution:

Copy section 99 from tab_filing of ABC01 to tab_filing of ABC50.

Additional Information

p_ret_01, adm
