
Implementation Notes in Service Pack are not clear

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 2
-

Description:

The new ARC SP 68 has implementation notes for most of the fixes. The first 3 are specific as usual but all the rest just say "Refer to the ARC SP v.2 document". This is not exactly clear - which part of the 28-page document should we refer to? I'm guessing (if it is the same for all the fixes) it must mean either update the schema or import the new content store, or both.

Resolution:

It means that both schema and content store should be imported. We will make the implementation notes clearer in the next SP.

This issue is still open and was escalated to Development for further investigation <2008-05-04 01:00:03>.
