Question

Is it possible, via X-services, general services, any other api etc. to mark monograph orders/items as arrived? There is a need to automate this process outside of a GUI user going into Aleph and marking an order as accessioned.

Answer

No, there is no X-service or any other service, no api etc. which would allow to mark monograph orders/items as arrived. These services cover mostly the circulation area of Aleph. There is an EDI message for the check-in of serial issues but nothing for accessioning monograph orders.
