
Adding new Item Process Status

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

We added two new process statuses to tab15.eng and pc_tab_exp_field.eng, but the new process statuses still do not display in the Status column of the GUI Items list.

Resolution:

The rule in tab15 is to list item process statuses first, then item statuses. In your library it was the opposite:

```
MHLRC 01 ## L Regular Y Y N N Y Y N Y N 00 C A
MHLRC 11 ## L 3 Hour Reserve Y N N N Y Y N N N 00 Y A
MHLRC 15 ## L 3 Day Loan Y N N N Y Y N N N 00 Y A
MHLRC ## RP L On Repair N N N N Y Y N N N 00 N A
MHLRC ## MI L Missing N N N N Y Y N N N 00 N A
```

We found that this order matters. Please change the order (first, list the item process statuses, then item statuses), and restart the pc_server.

[From site: this solved the problem.]

Additional Information

tab15, item process status
