## SFX ADMIN in /M not working

- **Article Type:** General
  - **Product:** MetaLib
  - **Product Version:** 4
- 

### Description:

I cannot get the SFX ADMIN link to work in metalib /M.  
It always defaults to the Ex Libris SFX demo server.  
I set SFX address in www\_server.conf.

### Resolution:

Change the link from pointing to the demo server to your server in /exlibris/metalib/m4\_1/dat01/www\_m\_eng/banner-1:

```
<td align=center class="banner1" width="10%" nowrap>  
<a href="javascript:open_window('http://exlibris.library.edu:9003/sfxadmin  
/rit');"  
title="SFX Admin"  
class="banner1">  
SFX ADMIN</a>  
</td>
```
