

Hebrew email

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

We can not see the Hebrew when we send Hebrew email from the Web OPAC basket.

Resolution:

In order to see Hebrew do as follows: 1. comment out the web to mail sections of \$alephe_unicode/tab_character_conversion_line 2. change \$alephe_tab/send_mail in so that the encoding will always be UTF-8 . Now you see the Hebrew in Outlook, webmail , etc...

Depending on email program you may need to do: View > Encoding > unicode (UTF-8).

Additional Information

Version 16, Hebrew Email,
