
Task Manager and Util/C/11 in ABC60

- **Article Type:** General
- **Product:** Aleph
- **Product Version:** 18.01

Description:

I am getting an error message when I try to look at the Batch Log in the File Manager or when I use Util/c/11 in PLN60. The error message is "Unable to sort batch log file". Remote Service Error c1202 10.

Resolution:

This is happening because there is no 'batch_log' file in the \$data_files directory for ABC60. As soon as you run your first batch service against the ABC60 library, the log will be created and the sort routine will then have a file to work with.
