Question

Is it possible to add a linkable URL to a form or to the help file for a specific field in directory xxx01/pc_tab_catalog/html?

Answer

Yes, you need to add a line like:

```
Congress' web site at <span class=ct3><a href="http://lcweb.loc.gov/marc/countries/"  
target=_new">Countries</a>
```

Some characters present in the URL must be replaced, from the code with the ASCII code. e.g.:
& by &
