

Closing serial orders in batch

- **Article Type:** Q&A
 - **Product:** Aleph
 - **Product Version:** 20
-

Question

Is there is an Aleph batch service which closes serial orders and subscriptions? Over 1000 serial order records need to be closed. The acq-28 process updates the order status to "closed," but the following also need to be done:

- 1) Update the "To date" on the "subscription info" tab for the serial subscription.
 - 2) Remove any action dates that would generate claims from the subscription order log.
-

Answer

Though the acq-27 service closes orders and related subscriptions and opens new orders and subscriptions, there is no service which just *closes* the subscriptions (and removes action dates from the order log) and doesn't open new ones.

This would need to be done using SQL.

Additional Information

KB 16384-49825 addresses the connection between the HOL record and the subscription.
