## Item call number not updating in Upper Pane in Course Reserves

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 19.01
- 

### Description:

The call number for this item was changed from BK4 B BERNAL COPY to BK 42 B BERNAL COPY. It is updated in all of the fields except for the top pane display in the Course Reserves GUI Client. How do we get these changes to be reflected in the top pane ?

The z30\_call\_no has BK 42 B BERNAL COPY.

### Resolution:

As described in KB 16384-16882, the author, title, and call number in this top panel come from the abc30 z13.

util f/4 shows this:

```
02 z13_rec_key \  
03 doc_number .....000026574  
...  
02 z13_call_no .....BK 4 B BERNAL COPY
```

The z13 is created by p\_manage\_07 and updated by ue\_01. It seems that ue\_01 has not been running in abc30. It should be.

I suggest that you:

1. run p\_manage\_07 for abc30 (-- which should take only a few minutes --). The z13 for 000026574 should then have call no BK 42 B BERNAL COPY. And then
  2. start ue\_01. (I see that ABC30 \*is\* in the "setenv WORD\_STARTUP\_LIBS" in aleph\_start.private, so nothing needs to be done in that regard.)
