
Mailserv entry in alephcom.ini

- **Article Type:** Q&A
 - **Product:** Aleph
 - **Product Version:** 20
-

Question

Is it possible to put in the mailservers name instead of the IP address of the mailserv in Parameter [Mail]
MailServer=
in .\alephcom\tab\alephcom.ini?

Answer

You can put in the mailservers name or the IP address of the mailserv. Both is possible.
