

Receipt for loan renewal with "Renew Marked"

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

When using the "Renew Marked" function, we get no receipt if only one item selected. If multiple items are selected, then a receipt *is* printed.

How do we enable the option to print a receipt if only 1 item (out of multiple) is selected?

Resolution:

This is how the system functions. Changing it is an enhancement request.
