
Rolling Bookings and check_booking_request_c

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

On our test server in tab-hold_request we have set the check check_booking_request_c for BK-POST:
"Item cannot be booked if the same item is already booked by the same patron at the same day when Z305-MULTI-HOLD=N."

However, multiple bookings are still allowed by the same patron on the same title in the same day. For all patrons Z305-MULTI-HOLD=N.

This check works for advance bookings. Please confirm whether it should also work for rolling bookings.

Resolution:

It does not currently work. SI Type changed to Enhancement Request.

This issue is still open and was escalated to Second line support for further analysis <2009-02-15 01:00:03>.
