Description

How to generate a report of Journals with Summary Holdings

Resolution

1. Run ret-01 to create an input file of journals (for example, FMT=SE)
2. Set up tab_expand in XXX60/tab:

```
BIB-HOL  expand_doc_hld_stmt      GET_Z30_BY=HOL
BIB-HOL  expand_doc_hol_86x
```

3. Set up tab_expand in XXX01/tab:

```
PRINT-COL  expand_doc_bib_hol
```

4. Add new entry to rep_tab_short.eng in XXX01/tab, for example 005 :

```
005 L Title      245##              025 02 C01 ---
005 L ISSN       022##              025 02 C01 ---
005 L Holding    866##              025 02 C01 ---   Y
```

5. Add 005 to ./pc_b_eng/p-print-08.xml :

```
<cbitem>
  <value>005</value>
  <display>Title | ISSN | Summary Holdings</display>
</cbitem>
```

6. Restart PC server
 7. Run Print Catalog Records - Columnar Format (print-08), select added format from the Report Format menu.
