### Description:

We want to add series title and number as a sort option in GUI. The 440 field subfields a and v are in the tab\_sort table but the series sort option is not displayed in the GUI sort fields window. 440 is still in the index even though it is an obsolete MARC field. How do we add 440 and 830 field as the sort option?

### Resolution:

You add GUI sort fields as "SO" lines in xxx01 pc\_tab\_sear.eng.  
The SO codes are defined in tab\_sort.
