## Print view drops capital T.

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 17.01
- 

### Description:

Search of Upper case at the beginning of the word is not displaying - why?  
here is my scenario:

1. Search for "Turkey"
2. save item to e-shelf
3. save/mail in e-shelf
4. Note that records show "urkey" with no T. I have report of similar bug with capital U.

It occurs regardless of which pre-defined record you choose, and also when you choose to "Create your own format."

### Resolution:

The problem was missing entries for the T (X'54') and U (X'55') in the character conversion table ( ./exlibris/aleph/u17\_1/alephe/unicode/unicode\_to\_ascii ). These lines need to be added:

```
0054 54  
0055 55
```

(Note: The current distributed ./a17\_1/alephe/unicode/unicode\_to\_ascii does have these in it.)

---

## Additional Information

save mail, e-shelf, initial letter, email, letter t
