## Documentation Update: to Load Authority Records (manage-31)

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 17.01
- 

### Description:

Documentation Update: to Load Authority Records (manage-31) - Help file

### Resolution:

In the p-manage-31.html (Help), (all versions, 18 included)

The following paragraph was changed from:

Note that the selected fix routine must include the fix\_doc\_preferred\_usm fix program, in order to trigger the creation of the COR field if the

heading field was corrected. Optionally, it may include the fix\_doc\_aut\_mesh fix program for a MeSH authority library.

to:

Note that the selected fix routine must include the fix\_doc\_preferred fix program. This triggers the creation of the COR field when the heading field is corrected.

[p\_manage\_31 can not be used for MeSH]

2) we also added the following paragraph:

The \$z105\_library ue\_11 should be stopped while p\_manage\_31 is running and restarted once p\_manage\_31 is done.

Corrected by the following:

fr v.16 #2115

fr v.17 #1091

fr v.18 #1181

p-manage-31.html - the remark about the MeSH Authorities has been erased and a note concerning the need to stop ue\_08 and ue\_11 has been added.

---

## Additional Information

p-manage-31
