
no word breaking routine was found for: L \$\$aanalculint

- **Article Type:** General
- **Product:** Aleph
- **Product Version:** 16.02

Description:

In running util f/13 (or ue_01 or p_manage_01), we see this error:
no word breaking routine was found for: L \$\$aanalculint

What "word breaking routine" is it looking for?

Resolution:

You are implementing the "Acronymic Title" field and index per 16.02 rep_change 1371. This rep_change calls for the use of expand_doc_acronym_title to create an "ACT" field and the addition of an ACT## line to tab11_word to index it. The rep_change shows that the tab11_word, column 6 (word building procedure) should be "92".

In your case this column 6 is blank. It needs to be corrected to "92".

Additional Information

word braking routine
