## What are abbreviations for composite index in SEARCHPARM table?

- **Article Type:** Q&A
  - **Product:** Voyager
  - **Product Version:** 8.1.1
- 

### Question

In the SEARCHPARM table, an index rule reads:

```
IX=C CS=6500~6501~6502~6503~6504~6505~6506~6507~600H~610H~611H~630H~651H~654H~655H~6900
```

I understand that the IX=C specifies that the index type is a Composite Index, but what does CS stand for?

---

### Answer

What follows CS= are the component search definitions for the Composite Index.
