

## What is Pfpc\_restore?

- **Article Type:** Q&A
  - **Product:** Voyager
  - **Product Version:** 6.5.3
- 

### Question

What is Pfc\_restore?

### Answer

In the event that FPC processing caused major corruption, users can restore the Acquisitions database via the Pfc\_restore program as long as you ran Pfc\_save before you ran Pfc\_run.

### Additional Information

- Please contact Support to help you determine whether a restore is needed.
  - Do NOT do any processing in Acquisitions until you are assured that the FPC went smoothly as certain data is NOT restored.
  - It is highly unlikely that a restore is needed as most mistakes can be taken care of by simply running FPC again or manually editing line items.
