
p_cir_32: z35 Oracle errors

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 16.02
-

Description:

I'm seeing this in the p_cir_32 job log:

Oracle error: fetch z35

ORA-01555: snapshot too old: rollback segment number 9 with name "_SYS

And the following in the Oracle alert_log:

ORA-01555 caused by SQL statement below (Query Duration=3700 sec, SCN: 0x0000.06aa2515):

```
select * from mbb50.z35 where z35_time_stamp >= :v1
```

What should be done?

Resolution:

You should kill this job and try running it at night (when fewer updates are occurring to the z35).

See also, KB 8192-2519.

Additional Information

ORA-01555
