

## Course reserve records not appearing in OPAC

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 18.01
- 

### Description:

We added some records manually using the Course Reserve Catalog form ([www\\_r\\_eng/doc-new-record-abc30](http://www_r_eng/doc-new-record-abc30)). Though we can see these in the Staff Course Reserve, we can't see them in the OPAC.

### Resolution:

In order for a record to show up in the OPAC, it needs to be Word and ACC indexed. The abc30 ue\_01 does that.

You can check if it is running with the abc30 util `c/1`. If there's a back-log it could take a while. You can check the `$data_scratch/run_e_01log` to see if a particular record has been processed.
