

How to remove Refresh request options

- **Article Type:** General
 - **Product:** Primo
-

Desired Outcome Goal:

How this is possible to hide "Refresh request options", in order to prevent the request change to title level?

Procedure:

There are two possibilities:

1. To hide the button:

- Change 'default.request.header.refresh_request_options' value under Code Table from "Refresh Request Options" into "<div style=display:hidden></div>".

2. Change a label:

- In BO go to Code tables / OvP/ Requests list labels

- Change the code default.request.header.refresh_request_options from "Refresh Requests Options" to "Title requests options" or "Additional request options".
