

Incorrect Update window in View basket

- **Article Type:** General
 - **Product:** Verde
 - **Product Version:** 2
-

Description:

In the e-constituents list, when entering to the update button and then into "View basket" window, the activate option of the update (in View basket) opens e-Package list update instead of "Activation" window.

Scenario for example:

- 1- Login to the UI.
- 2- Choose/create an active e-package and go to the package list.
- 3- Add few constituents to the basket
- 4- Enter into View basket
- 5- Click on Update (in View basket), then click on activate. An activation window for the e-constituents should pop-up (marked as 1 in the attached screenshot).
- 6- Close the pop-up window.
- 7- Press "Update" button (in package list) and then click on "Cancel" to close the "Update" window
- 8- Repeat step 5. This time, instead of the pop-up window you received in step 5, you will get the pop-up window from step 7 (marked as 2 in the attached screenshot).
