

Can't find/retrieve local records

- **Article Type:** General
 - **Product:** Primo
 - **Product Version:** 3
-

Problem Symptoms:

• Local searches do not return results

• In SE log you see: 0 documents loaded

Cause:

Corrupted index file

Resolution:

Copying the index file from the mirror directory:

1. In the FE server, type `se_conf`
2. Type `cat search_schema.xml`
3. Look for the index path under `<slice id="1">`
4. Go to index directory `cd /exlibris/primo/indexes/px_y/inst_1_index`
5. Go up one level `cd ..`
6. Copy the `inst_1_index.mir` directory into the `inst_1_index` directory using this:
`cd inst_1_index.mir`
`cp -rp * ../inst_1_index`
7. Type: `se_stop`
8. Type: `se_start`
