

expand_doc_bib_hol and “STA SUPPRESSED”

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Problem Symptoms:

Program expand_doc_bib_hol in xxx01/tab/tab_expand expands information from HOL record although HOL record has field “STA SUPPRESSED” and should not be expanded. This happens when there is a 2nd. STA field in the record which is before the “STA SUPPRESSED” field.

Cause:

System behavior

Resolution:

Everywhere in ALEPH where the STA field is checked (for DELETED as well as for SUPPRESSED), it is checked only once. Solution is either to have only one STA field, or to put the SUPPRESSED/ DELETED one first.
