## Conversion of MAB records after switching to GND

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 20, 21, 22, 23
  - **Relevant for Installation Type:** Dedicated-Direct; Direct; Local; Total Care
- 

### Problem Symptoms:

After switching to GND the conversion from authority tags in bib records (from MAB to MARC21 format) does not work anymore.

Cause:

The relevant tags in MAB which are linked to the authority database got new subfields, they are not included in the standard conversion of xxx01/tab/tab\_fix\_mab2usm.

### Resolution:

1. Implement the new programs for export MAB data, which convert the new subfields to the old regular MAB-Export.

table tab\_fix\_mab

```
100 fix_doc_mab_gnd_build_100
104 fix_doc_mab_gnd_build_100
...
200 fix_doc_mab_gnd_build_200
204 fix_doc_mab_gnd_build_200
...
800 fix_doc_mab_gnd_build_800
902 fix_doc_mab_gnd_build_902
907 fix_doc_mab_gnd_build_902
```

2. Before performing the conversion of bib records with tab\_fix\_mab2usm export the records with xxx01/tab/tab\_fix\_mab. The entries in xxx01/tab/tab\_fix can be:

```
MABUS fix_doc_mab FUNC=OUTPUT,FILE=tab_fix_mab
MABUS fix_doc_mab FILE=tab_fix_mabaseq
MABUS fix_doc_convit FILE=tab_fix_mab2usm
```
