

Rosetta 4.1 SDK

- **Article Type:** General
 - **Product:** Rosetta
-

Problem Symptoms:

An error when using API generateStructMap from 4.1 SDK

Cause:

The problem only occurs when the second parameter is set to "null" where the code mistakenly tries to retrieve the default value from the DB, for example:

```
generateStructMap(null,null, "Table of Contents")
```

Resolution:

populate the second parameter with value, for example:

```
generateStructMap(null,"?Preservation Master"?, "Table of Contents")
```
