  - **Product Version:** 16, 18, 19, 20, 21, 22, 23
- 

### Question:

Is it possible to add additional sort options for the report created by ret-adm-01?

### Answer:

It is possible to add any sort key from xxx01/tab/tab\_sort to the p-ret-adm-01.xml file. This means that you can add only fields from the BIB record OR expand fields from the item record using e.g. expand\_doc\_bib\_z30 in order to add them to tab\_sort and to sort by them.
