
p_manage_17: looping; ERROR: Counter last-long-acc-number not defined

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
-

Description:

p_manage_17 is running in a loop with the message:

```
"Unable to open file /exlibris/aleph/u16_1/abc02/scratch/p_manage_17.cycles  
sleeping...?"
```

I can also see in the log "ERROR: Counter last-long-acc-number not defined"/

Resolution:

The abc02 util g/2 list had no last-long-acc-number parameter. (Note: these parameters come from the z52 table.) It needs to be added, with a value of "0".
